

**MEDIA RELEASE** Victoria BC, Canada, March 29, 2007  
**FOR IMMEDIATE RELEASE**

**Bluewater Technologies Corporation introduces NEW Consulting Division**

**Bluewater Technologies Corporation** ([Bluewater](#)) announced today the launch of their Consulting Division. Mr. Doug Stables, *BSF MBA RPF*, President of [Bluewater](#) states, "The Consulting Division addresses the growing need for specialized industry initiatives in the underwater resource recovery sector."

"The skills, unique intellectual property and patent pending technology that [Bluewater](#) has developed over the last 12 years, positions [Bluewater](#) to provide industry expertise in this area of specialization. The growth of this sector, particularly in underwater tropical hardwood recovery and mining, has resulted in opportunities to provide our consulting expertise to international companies and governments," says Mr. Stables. [Bluewater's](#) consultation practice focuses on ROV manufacture and design, wood marketing, and resource recovery.

[Bluewater Consulting Division](#) is currently engaging with International clients in the planning, resource recovery, and manufacture of ROV technology for deployment in Latin America.

---

**Bluewater Technologies Corporation** is a private, Canadian owned company, based in Victoria, BC, established to manufacture, sell, and consult to the underwater resource recovery sector.

**Bluewater Technologies Corporation** manufactures specialized remotely operated vehicles (ROV) **ROSCO**<sup>®</sup> for sale to value added retailers and industrial partners for deployment in water bodies' worldwide. **ROSCO**<sup>®</sup> and related technology (patent pending) is at the forefront of underwater resource recovery technology.
